polypropylene

Application

Indoor and outdoor use.

Description

Recycled polypropylene is obtained thanks to a recycling process using up to 75% - 95% of recycled material.

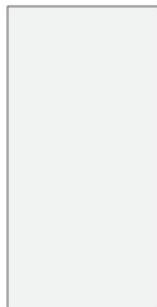

Samples are purely indicative because recycled polypropylene color can vary widely from grey to a lighter color.

Care

Dust with a soft and dry cloth for the normal cleaning. Never use abrasive or aggressive products like solvents, acid or basic solutions or ammonia. Any liquid spilt on the product must be wiped up immediately. Any changes in the surface and in colours may occur under particular conditions of weather exposure and cannot be considered a quality issue.
